Brampton, Ontario, L7A 4M5, Canada

As an IT student committed to my field, I'm passionate about enhancing my expertise in web and app development. I thrive on problem-solving and innovation, constantly seeking opportunities to broaden my knowledge, apply my skills, and contribute to transformative, technology-driven solutions that boost efficiency.

Work Experience

Web Developer   Feb 2023 - May 2023

Kashcandi Technology | Vadodara, India

- Learned React.js to develop dynamic and responsive UIs using functional components and hooks.
- Built reusable and modular components for improved scalability.
- Explored Node.js with Express to handle asynchronous operations efficiently using Promises, async/await, and middleware.

Projects

Café management System   Jul 2024 - Aug 2024

The Cafe Management System is a C# application designed to perform CRUD operations on key cafe data. This system enables users to efficiently manage cafe operations, including adding new menu items, retrieving order details, updating inventory records, and deleting outdated entries.

Medication Reminder Application

Jan 2025 – Present

This project is a medication reminder application that enables users to schedule, track, and manage their daily medication routines. Featuring an intuitive interface, customizable reminder settings, and seamless integration with calendar notifications, the system ensures users receive timely alerts, promoting consistent and effective medication adherence.

Volunteer

Promotion Coordinator

Dec 2022 - Jan 2022

Prakarsh (National Inter College Event)

In this role, I spearheaded promotional initiatives for Prakarsh, a national-level technical symposium at my college. I managed campaigns across nine state zones, effectively promoting both technical and non-technical event activities in various cities.
